

## THE ULTIMATE PHARMACY AUTOMATION PACKAGE.

Concentrate on your profession, and trust ScriptAssist to take care of your business from prescription entry and refill through reimbursement. With CompoundAssist (included), you can profit from your compounding pharmacy practice.

- Provides multi-tasking environment
- Transmission of Medicare claims online
- Near instantaneous claim adjudication via Internet
- Supplies state-of-the-art, mission critical database server
- Fax refill requests automatically to the doctor
- Reconciliation assistance with insurance analysis reports
- Tracks and schedules automatic patient refills

Script Assist gives you full control over every step of your business, integrating patients, physicians, drugs and payers in a single, Windows-style program. From its intuitive screen, you can process incoming prescriptions, fax refill information to physicians, and confirm near-instantaneous adjudication of claims. In many cases, you will find that it also works seamlessly with your wholesale ordering software to manage inventory and keep track of profits.

*Unlike competing software products, ScriptAssist also manages your specialty pharmaceutical business, including compounding. You can automatically collect patient and physician information, along with Usual and Customary pricing for prompt payment.*

# THE ULTIMATE PHARMACY AUTOMATION PACKAGE, INCLUDING COMPOUNDING.

*Unlike competing software products, ScriptAssist also manages your specialty pharmaceutical business, including compounding. You can automatically collect patient and physician information, along with Usual and Customary pricing for prompt payment.*

**Q: I've used pharmacy systems before, and I found the multiple text screens confusing.**

A: ScriptAssist uses the familiar Windows interface for all transactions--If you can use Word or Excel, you'll be able to grasp ScriptAssist in no time! Plus, ScriptAssist was written and developed by pharmacists, so screens and procedures are tailored for the way your practice works.

**Q: Is this a MONEY system or a PRESCRIPTION system?**

A: ScriptAssist is BOTH! It allows you to enter prescriptions and track them through delivery. It also helps you collect information on patient, physician and drug in the form requested by third-party prayers for prompt adjudication.

**Q: We are considering offering compounding services to patients and clinics in our market area.**

A: Then this is the suite for you! CompoundAssist is the premier software for compounders; it combines templates and formulas for thousands of medications with a complete inventory and ordering program. When you purchase ScriptAssist, you receive CompoundAssist at no extra charge. CompoundAssist works within ScriptAssist to let you expedite third-party reimbursement (including Medicare reimbursement) for compounded medications.

**Q: Can we change our labels easily?**

A: Yes, ScriptAssist has a graphical label designer which makes changing and adding labels very easy.
