

# UNGUATOR ASSIST

RS SOFTWARE GAKO

## Get the job done with the UNGUATOR 2000 Electro Mortar and Pestle.

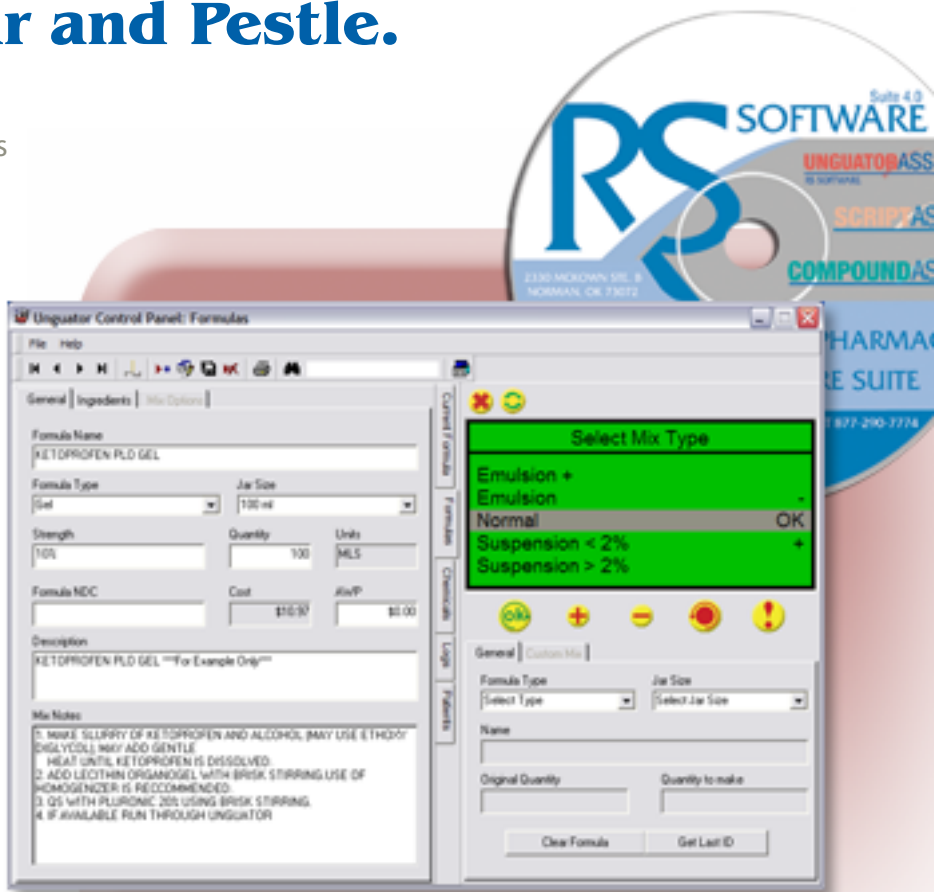

The UNGUATOR 2000 operates efficiently as a stand alone machine by itself or assisted by its newly available Windows based software package.

Prepares everything from reaction mixes to high-speed homogenizations thanks to its flexible speed range of 50 rpm to 3,000 rpm.

Pre-programmed mixing parameters automate preparations. Manual programming for formulation mixing optional

Computer-assisted design allows for automatic recipe saving, customization, and retrieval.

Prints labels, test results, and other types of documentation.

*"Praised throughout the pharmaceutical industry for its accuracy and consistency in formulations."*
